Summary:
The paper proposes Method M for Task T and evaluates it on Dataset D.

Soundness: 2: fair
Presentation: 3: good
Contribution: 2: fair

Strengths:
The paper is well written. The experiments are extensive.

Weaknesses:
1. The comparison with Baseline X is missing, which makes it hard to assess the improvement claimed in Section 4.
2. The ablation of Component Y is not reported, so it is unclear which part of the method matters.

Questions:
1. Why is the threshold set to 0.5? Please clarify how it was chosen.

Flag For Ethics Review: No ethics review needed.
Rating: 5: marginally below the acceptance threshold
Confidence: 4: You are confident in your assessment
Code Of Conduct: Yes

Official Comment by Authors

Comment: We thank the reviewer. We added Baseline X in Table 3 of the revision.

Official Review by Reviewer wxyz 02 Nov 2026, 11:00 Everyone

Summary:
This work studies Task T with a placeholder approach.

Strengths:
Interesting idea and strong results.

Weaknesses:
The evaluation lacks a comparison with Baseline X on Dataset D. Also, the writing in Section 3 is hard to follow and there are several typos.

Questions:
Could you report the variance over five random seeds?

Rating: 6: marginally above the acceptance threshold
Confidence: 3: You are fairly confident

Comment: Thanks for the response. I still think the novelty over Line of Work Z is limited.
